

Abstracts Highlighting FERRING Data

O-011 / 4 July 10:00 CEST

A prospective multicentre, non-interventional, real-world study to assess the pattern of use, effectiveness and safety of follitropin delta in routine clinical practice (the PROFILE study)

C. Blockeel, G. Griesinger, R. Rago, S. Rivière, P. Larsson, Y.L. Yip Sonderegger, J.S.E. Laven

O-013 / 4 July 11:00 CEST

The individualised dosing algorithm of follitropin delta, developed in a GnRH antagonist protocol shows to be highly effective in a long GnRH agonist protocol

M. Fernández-Sánchez, P. Larsson, M. Ferrando Serrano, E. Bosch, J.A. García Velasco, E. Santamaría López, B. Mannaerts

P-755

Conventional outcome reporting per embryo-transfer cycle systematically underestimates the chance of success of women undergoing ART: a source of bias in registries, trials and guidelines

G. Griesinger, P. Larsson, B. Mannaerts

Legend

- e-poster (P)
- oral presentation (O)

P-567

Recombinant hCG (choriogonadotropin beta, CG beta) exerts a positive dose-dependent effect on human follicular steroidogenesis during ovarian stimulation

J.A. Bøtkjær, S.G. Kristensen, H.Ø. Olesen, P. Larsson, B. Mannaerts, C. Yding Andersen

P-568

The effect of recombinant hCG on FSH-induced ovarian stimulation in rats depends on the FSH dose and can be detrimental at high concentrations

E. Schoeller, S. Jespersen, E. La, J. Ramirez, D. Hong, M.L. Rives, B. Mannaerts

P-143

The initial blastocyst size after warming is a strong predictor for clinical pregnancy in single vitrified blastocyst transfer

L. Iversen, A. Gabrielsen, T. Veng Eskildsen, S. Ravn Hansen, P. Larsson, B. Mannaerts

P-134

The robustness of Gardner & Schoolcraft (GS) scoring prior vitrification for selecting a single vitrified blastocyst for transfer

N. Prados Dodd, M. Ruiz, R. Hüttelová, P. Larsson, M. Fernández Sánchez, H. Višnová, B. Mannaerts
